# Care of Perivable Infants

Presented by Jonathan M. Klein, MD

Survival for perivable infants is improving. Neonatal intensive care specialist, **Jonathan M. Klein, MD**, shares his expertise and strategies to care for these extremely premature infants at 22–24 weeks' estimated gestational age. Multidisciplinary teamwork and standardization of practice are essential strategies to allow extremely preterm infants the potential to survive and thrive. Join Dr. Klein's examination of the survival, morbidity, and 2-year outcomes for perivable infants at a center with a proactive philosophical approach, as well as his review of NICU practice improvements, including the critical use of antenatal corticosteroids prior to 24 weeks.

### About the Presenter

Jonathan M. Klein, MD, is Staff Neonatologist, Medical Director, Neonatal Intensive Care Unit, Medical Director, Nurse Practitioner Program, NICU, at the University of Iowa Children's Hospital in Iowa City.

### Learning Objectives

- Describe the cultural factors that impact survivability and neurologic outcomes for perivable infants born at 22–23 weeks' gestation
- Understand differences in management strategies when caring for perivable infants born at 22–23 weeks' gestation
- Review survival, morbidity, and 2-year outcomes for perivable infants born at 22–23 weeks' gestation at a center with a proactive philosophical approach
